

Do I need to install anything to access BenchSci's data?

Nope - you just need internet access!

BenchSci's database is navigated through a web-based application, so all you need is a [modern web browser](#) and a stable internet connection. Our application works on all major internet browsers (e.g. Google Chrome, Mozilla Firefox, etc.).

If you ever experience strange behaviour, try opening an incognito/private browsing window or clearing your cache.
