

What is the difference between typing specs into the search bar vs. using the side filters

Last Modified on 27/07/2022 11:47 am EDT

Your results will be the same regardless of how you prefer to search

If you select a search suggestion based on what you entered in the search bar, you can further refine your search by typing and adding more terms to the **search bar** or using the **side filter** panel.

Check out these articles for more information about the **search bar** and **side filters**.
