

Why can't I find a specific vendor or product?

Last Modified on 15/04/2021 7:53 pm EDT

We maintain the largest antibody database in the world and we're still expanding

There are a few reasons we might be missing a product you're looking for:

- We don't yet have that vendor's catalog in our database
- It's a new product from a vendor we already have a relationship with

In either case, [let us know](#) and we'll reach out to them for their latest catalogs so we can [update our database](#).

Checking if we have a specific vendor

1. Navigate to the products results tab
2. Open the **Company** filter under *Supplier filters*
3. Search the list for your vendor of choice

When you select the vendor, we'll show you all of their products on the platform.

The screenshot shows the BenchSci website interface. At the top, there is a search bar with the text "Enter protein/gene target, clone ID, catalog #... e.g. 'TLR4 human' or 'PC10 western blot'". Below the search bar, there are two tabs: "PRODUCTS (10.4 M)" and "FIGURES (6.9 M)". On the left side, there is a "Filters" sidebar with various categories. The "Supplier Filters" section is expanded, and the "Company" filter is highlighted with a red box. The main content area displays two product cards. The first card is for "Monoclonal Anti-beta-Actin antibody produced in mouse" by Sigma-Aldrich | A5441, with 9043 figures. The second card is for "Monoclonal ANTI-FLAG(R) M2 antibody produced in mouse" by Sigma-Aldrich | F1804, with 7525 figures. Each card includes a "Verified Antibody" badge, a thumbnail image, and a list of assay types (WB, IS, IF, IP, IHC, CHIP, FCY, ELISA, WB (BN), ICC, IHC, IF (LCM), ELISA).

Searching for a specific product

If you are [searching for a specific product](#), simply type the catalog number of the product into the search bar. Clicking the search suggestion will navigate you directly to the product page.
