

# Finding RNAi products by catalog # or siRNA ID

Last Modified on 03/02/2022 6:07 pm EST

Search by catalog # or siRNA ID to navigate directly to product pages

If you want to search for a specific product, maybe to benchmark your own results or explore how it's been used in the literature, you can navigate directly to the product page using the **catalog #** from almost any vendor we have on the platform (see below). Product pages give you information like the target, reactivity, accession ID, tissues and cell types tested, and where it's been used in the literature. Clicking on the product search suggestion opens the product page for you in a new tab.

The exception to this approach is Thermo Fisher products. Because of how their inventory is organized, RNAi reagents are discoverable by **siRNA ID/Assay ID** rather than catalog #. The siRNA ID is readily found on product pages hosted by Thermo Fisher.
