

# Are pooled siRNA products represented?

Last Modified on 03/02/2022 6:03 pm EST

Pooled siRNA reagents can be found in the products tab among the other RNAi products

Some RNAi reagent vendors (e.g. *Dharmacon/Horizon Discovery*) offer a single product containing a pool of varied siRNA products targeting the same gene. This is a strategy to increase the likelihood of successful expression manipulation compared to single siRNA products. You can find pooled reagents like you would other RNAi reagents in our app: [search for your target of interest](#), indicate the [Reagent Type](#), and then browse the figures and available products. Compare the pooled reagents against their non-pooled counterparts to find the one right for your experiments.

Find out more about the gene that was targeted by looking at the **Accession IDs** under product info for pooled products.

SPECS EXPERIMENTAL DATA TARGET INFO

## Product Info

PRODUCT SPECS ^

**Target** TARDBP, TAR DNA BINDING PROTEIN, ISOFORM CRA\_B +2 more

**Reactivity** Human

**RNAi Type** siRNA

**Brand** ON-TARGETplus®
