

MicroRNA mimics and inhibitors

Last Modified on 03/02/2022 6:12 pm EST

Both miRNA types are represented

MicroRNA (miRNA) is one of the **RNAi Types** available for *RNAi*. In research, there are two general categories of *miRNA*—mimics and inhibitors. In our app, both product types are visible together when you select the *miRNA* product subtype. If you are presented with an overwhelming number of products, try adjusting your search to include the specific miRNA accession as a **target** (in the format miR-xxx). This should help limit the number of results and help the mimics vs inhibitors stand out.

RNAi Type	Products	With Published Figures
<input type="checkbox"/> shRNA	6.5 M	8.4 K
<input type="checkbox"/> siRNA	6 M	34.5 K
<input type="checkbox"/> miRNA	333.7 K	232

If filtering mimics from inhibitors is important to your workflow, we'd love to [talk to you about it!](#)
